Git, Github, VSCode, Visual Studio 2022

SOFT SKILLS

- Team Work
- Critical Thinking
- Creativity
- Adaptability

LANGUAGES

- Portuguese (Native)
- English (B2)

WORK EXPERIENCE

Horus Software   Jan 2024 - Mar 2024

Font-End Developer | Full-Time

Led the conceptualization and development of a dynamic project from inception to execution.

- Frontend engineering.
- Javascript, HTML, CSS and Git.

InforViana   Sept 2015 - Jan 2018

Trainee Software Developer | Full-Time

Professional internship that occured in parallel to my high-school studies. I had the chance to learn immensely about my field and connect with professionals in the area. I was able to develop and apply my theoretical knowledge from school and gained valuable insight about working and behaving in a team.

- Front-end & Back-end engineering.
- Brainstorming and solutions development.
- Javascript, HTML, CSS, Bootstrap and Git.

PROJECTS

Front-End Development

I have created multiple front-end pages using technologies such as HTML, CSS, Bootstrap, ReactJS, NextJS, and JavaScript. Below are some examples of my work:

- **Taxiaraujo:** A responsive website for a taxi service, providing users with easy access to booking information and contact details.
- **OtiliaeRosa:** A visually appealing personal website with a focus on design and user experience.
- **AI Summary:** A web application that generates concise summaries of long texts using AI, built with a clean and intuitive interface.
- **RS Car Hub:** A modern website for a car dealership, featuring an attractive layout and interactive elements to enhance user engagement.

Full-Stack Development

I have developed some full-stack projects, showcasing my expertise in a variety of technologies. Below are the details:

- **Airbnb Clone:** A full-stack clone of Airbnb, featuring user authentication, dynamic routing, and responsive design using React, Tailwind CSS, and MongoDB.
- **Vitaly:** A comprehensive e-commerce web application built using PHP and Laravel, featuring a modern user interface and robust back-end functionality.
- **Fusion:** A personalized scheduling application developed with NodeJS, JavaScript, HTML, and CSS, designed to manage and optimize user schedules efficiently.

Game Development

I have developed several games, leveraging my skills in C#, Unity3D, HTML, CSS and JavaScript.
